DANIEL BARNARD,	

FIRE-WARD'S REPORT.

The board of engineers for the town of Franklin for the year 1875-6 beg leave to submit the following report :

The Fire Department, as regards apparatus, number and appointments are substantially as last year, with the addition of 534 feet leather hose from the manufactory of Samuel Eastman & Co., of Concord, which addition gives all the hose that can be usefully employed with the engines and other apparatus that we have in use.

Nothing has been done the present year in regard to a further supply of water for the extinguishment of fires, and in the opinion of the firewards it is of the utmost importance that this matter should be acted upon, and something practical, economical, and at the same time of sufficient quantity should be devised to protect ourselves from devastation from fire. We consider this of much more importance at the present time than increasing our apparatus.

In some particular localities we should be perfectly powerless to do anything to put out a fire till it would be absolutely too late to accomplish much good.
